

Evy Ng

Colorado Springs, CO · evy.xng@gmail.com · 719-722-6001 · www.linkedin.com/in/evy-ng · <https://github.com/evy004>

TECHNICAL SKILLS

Languages: JavaScript, HTML/CSS, Python, C/C++, Typescript, SQL, Java, Scala, Swift

Frameworks & Tools: Git, React, Azure, Node.js, PyTorch, TensorFlow, Pandas/NumPy, Agile/Scrum, Figma, Adobe CC

EDUCATION

University of Colorado Boulder – College of Engineering & Applied Science

August 2022 - May 2026

Bachelor of Science in Computer Science, Minor in Creative Technology and Design

Cumulative GPA: 3.6/4.0

- **Honors:** Dean's List, CU Esteemed Scholars, Society of Women Engineers, Society of Asian Scientists and Engineers
- **Relevant Courses:** Software Development, Database Systems, Object-Oriented Design, Data Science, Data Structures, Algorithms, Object-Oriented Design, Discrete Mathematics, Natural Language Processing, Operating Systems

EXPERIENCE

EVOKE - World Bank, Boulder, CO

February 2026 - Present

Creative Technologist & Producer Intern

- Developed a Python-based badge system using FastAPI to automate in-game rewards for student achievements.
- Designed a React AI interface in Minecraft to deliver narratives, teaching students educational concepts through gamified UI.

Rent-A-Buffer

August 2025 - Present

Co-Founder & Lead Frontend Engineer

- Designed and implemented backend queries via Convex to ensure seamless data flow between user interface and database.
- Implemented comprehensive style guides using React and TypeScript for seamless data flow improving efficiency by 25%.

University of Colorado Boulder, Boulder, CO

April 2023 - May 2026

Course Assistant

- Tutored over 1000+ students in C++ and Object-Oriented Principles through recitation assignments.

University of Colorado Boulder, Boulder, CO

June 2025 - December 2025

Research Assistant

- Achieved 85% predictive accuracy by developing a Random Forest model using Python to estimate indoor PM2.5 levels.
- Increased dataset integrity by 20% by designing automated cleaning pipelines for 50,000+ records using Python/Pandas.

Hottop Games, Colorado Springs, CO

May 2024 - September 2024

Game Programmer

- Built and optimized gameplay systems in C++ and Unreal Engine, achieving a 25% increase in frame rate and 40% reduction in system crashes. Designed modular architecture components for efficient resource management to ensure prime gameplay.
- Collaborated in Agile sprints (300+ hours) using Git, reducing bug reports by 25% and improving system stability by 35%.

PROJECTS

Riftbound TCG Resource Hub

Spring 2026

Python, FastAPI, PostgreSQL, BeautifulSoup

- Developed an end-to-end data pipeline to seed a PostgreSQL database with rare game metadata lacking public API support.
- Built an automated inventory reconciliation system that manages multi-parameter card states using SQLAlchemy ORM.

Dungeon Escape

Fall 2025

Java, Object-Oriented Principles, Git

- Remade the core gameplay mechanics of Dungeon Escape from the ground up, incorporating modular inventory, map navigation, and combat systems using Java and VSCode.
- Increased system performance and maintainability by 35% by creating modular object-oriented components.

LEADERSHIP

Chinese and Taiwanese Student Association (CATSA), Boulder, CO

Spring 2025 - May 2026

Co-Vice President and Secretary

- Directed club administration and stakeholder outreach, optimizing meeting schedules and event coordination.

T9Hacks, Boulder, CO

Spring 2024 - May 2026

Vice President and Software Development Lead

- Created high-fidelity Figma prototypes and redesigned the club website to add a responsive UI in HTML/JavaScript.
